INTELLIGENT BINDING MACHINE

The Intelligent Binding Machine is a multifunctional device that utilizes advanced technology in the 21st century.

This machine can bind paper, scrip, and gauze, as well as large-sized covers both individually or together.

The switch between EVA and PUR adhesives is seamless due to its fast interchange function.

Furthermore, this machine adopts a computerized operating system with a mill chamber construction, side rubber wheel indentation wheel, book-wrapping table, cover size adjuster, and an automatic computer setter.

It's equipped with a frequency controller and PLC for control, plus photoelectric cells, an auto tester, and a touch screen display to provide an easy user interface.

Max book size	450 x 300mm
Min. book size	150 x 105mm
Number of clamp	4
Binding speed(Max.)	2000 books/hour
Binding thickness	1.5-50 mm
Weight	1900 Kg
Dimensions	3300 x 1330 x 1250mm
